

Release Notes (3/11/2016)

New Features

- **New filters added to Browse Encounters** – Harvest Type, Release Type, Year Class, Federal Status, and Mortality Flag were all added to the Browse Encounters page.

The screenshot shows the STReaMS web application interface. At the top, there is a navigation bar with links for Home, View & Edit Data, Batch Uploads, Downloads, Help & Documentation, and Contact Us. Below the navigation bar is a search and filter section with a search bar and a 'More >>' link. The main content area is titled 'Browse Encounters' and displays a message: 'You are viewing 1,078,564 of 1,078,564 encounters. How would you like to filter results?'. Below this message are several filter sections with dropdown menus and input fields for Species, Encounter Type, River, Basin, River Mile Down, River Mile Up, Study, Sampling/Stocking Org, Parent Org, PIA Location, Date Range (YYYY-MM-DD), Harvest Type, Release Type, Year Class, Federal Status, and Mortality Flag. A 'Filter Results' button is located below the filters. Below the filter section are buttons for 'Clear Filters', 'Download', and 'New Encounter'. The main content area also shows a 'Show 50 entries' dropdown. Below this is a table with columns: ID, Current Tag, Species, Encounter Type, Date, River, River Mile, Antenna, Notes, and Options. The table contains three rows of data, each with a 'View Details' and 'Delete' button in the Options column.

ID	Current Tag	Species	Encounter Type	Date	River	River Mile	Antenna	Notes	Options
1070603	3D91C2DFEBD85	Unidentified	Detection	2015-11-06	McElmo Creek		McElmo Creek		View Details Delete

Bug Fixes

- **Encounter Details on the PIA Location page** - clicking on details associated with Encounters linked to a PIA on the PIA Location page was not doing anything. The page now brings up Encounter Details as intended.
- **Encounter List associated with Studies** – the Edit Study page listed all Encounters in STReaMS instead of Encounters associated with the Study. This has been fixed to show only Encounters related to the Study in the list.
- **Add a Study to a new Encounter** – when you add a new Encounter manually, you can now select a Study to link it to.
- **Display Sampling/Stocking Organization on Encounters page** – the sampling organization on the Encounter page was constrained by the agency associated with the Encounter's Study. Data entry errors on the Study page prevented the sampling organization from appearing correctly on the Encounters page. This constraint was originally implemented as a front-end quality control measure. The constraint has been removed and these relationships will be checked using data manager quality control tools instead.
